

NIKHIL PATEL

Java Backend Developer • Spring Boot • REST APIs • MySQL

+91 8429956540 | np99354429@gmail.com | github.com/Nikhil-UU | linkedin.com/in/nikhil-patel-001493371

PROFESSIONAL SUMMARY

Detail-oriented Java Backend Developer and MCA student with hands-on experience designing, building, and optimizing scalable, secure enterprise web applications. Proficient in Java, Spring Boot, Spring MVC, and RESTful API development. Strong foundation in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), and database management (MySQL). Proven ability to implement robust security protocols, manage object-relational mapping with Hibernate/JPA, and optimize backend queries to deliver seamless and highly efficient user experiences.

TECHNICAL SKILLS

Programming Languages: Java (Core & Advanced), SQL, JavaScript

Backend Technologies: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, JDBC, REST APIs

Databases: MySQL

Tools & Platforms: Git, GitHub, Maven, Postman

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS, MVC Architecture, SDLC, JSON, Authentication & Authorization

PROFESSIONAL EXPERIENCE

Spring Boot Developer Intern

United University, Prayagraj

- Designed and engineered robust RESTful APIs utilizing **Java** and **Spring Boot**, improving backend data retrieval efficiency and platform reliability.
- Implemented secure and scalable CRUD workflows by leveraging **Spring Data JPA** and **Hibernate** for seamless object-relational mapping.
- Optimized complex **MySQL** database queries and indexing, significantly reducing API response latency during integration testing.
- Utilized **Postman** to execute comprehensive automated endpoint testing, validating edge cases, payload structures, and response codes to ensure production-grade reliability.
- Adhered strictly to **MVC layered architecture** (Controller, Service, Repository) and clean code best practices to maximize code reusability and system maintainability.

PROJECTS

Hospital Management System

Spring Boot, Spring Security, Spring Data JPA, MySQL

- Developed a full-scale, role-based backend application to securely handle complex workflows across patients, doctors, appointments, and medical records.
- Secured sensitive endpoints and administrative routes by implementing robust authentication and authorization mechanisms using **Spring Security**.
- Built high-performance RESTful APIs integrated with a optimized **MySQL** database, ensuring secure transactions and zero data loss.

Banking Management System

Spring Boot, Spring Data JPA, Hibernate, MySQL

- Architected a comprehensive banking backend system specializing in secure user account management and financial transaction simulations.

- Enforced transactional data integrity by implementing secure atomic CRUD operations and structured REST endpoints.
- Utilized **Spring Data JPA** to abstract data access logic, minimizing boilerplate code and enhancing database execution speed.

Employee Management System

Spring Boot, Hibernate, MySQL

- Created a modular employee lifecycle management platform supporting high-concurrency workforce operations and CRUD functionality.
- Structured a decoupled codebase using dedicated controller, service, and repository layers for scalable enterprise deployment.

EDUCATION

Master of Computer Applications (MCA)2024 – 2026

Chandigarh University, Mohali

Bachelor of Computer Applications (BCA)2021 – 2024

United University, Prayagraj

CERTIFICATIONS

- **Spring Boot Certification** – Advanced Application Development
- **Java Programming Certification** – Core & Advanced Software Engineering
- **MySQL Certification** – Relational Database Management Systems & Architecture
